We have been supporting gastro businesses in Poland and abroad for **over 30 years!**

We are practitioners who know power of gastronomy. Your challenges are our challenges, too, so we offer solutions to help you achieve your goal - with us, you'll get the satisfaction and take pride in your work.

Together with restaurant owners, distributors and our partners, we are changing the catering market. In times of uncertainty, we believe that this is a job for **strong, dynamic and proven players.**

We are a family business. We have been sharing our knowledge and experience for **two generations.** This is also how we approach business - as partners, based

on mutual **trust and support.** Working with us, you can count on facing together: the daily and long-term challenges of the catering business: through kitchen equipment, selection of furniture or accessories, to professional service at every stage of the purchase.

Satisfaction with well-prepared dishes and, as a result, the satisfaction of our clients is our greatest motivation. After all, as a leader, we feel responsible not only for our customers, but also for the entire catering industry, setting trends and new directions of development.

We are the Central European market leader and the largest HoReCa company in the local market. You can count on us.

In 2008, we launched a factory of catering equipment and accessories in Radom, and we are successively developing our offer. Production is carried out in a modern machinery park, which gives us great opportunities for rapid implementation and precise individualization of orders.

We manufacture stainless steel furniture, dishwashers, heating lines, serving lines and small setting equipment. We also manufacture plastic accessories (such as dishwasher baskets and catering boards).

Polish manufacturing

Modern Factory of Catering Equipment in Radom.

In 2018, we launched the industry's most modern Logistics Center, where distribution to domestic and foreign customers is organized using the latest processes and technologies.

- Capacity of almost 20 000 pallets
- Same-day handling time
- More than 7500 products in stock
- 10 ramps

We support gastronomy in ECO style

We have been taking care of what is important for the catering market for years. We support and offer equipment tailored to a wide variety of establishments. However, our commitment goes much further. We want to have a real impact both on the development of your business as well as on environmental protection. That is why in our daily work we introduce solutions that allow you to be ECO on many levels.

Plastic reduction

In 99% of cases, we dispense with the film that coats the sheet during production and delivery. As a result, we are reducing its use.

Energy-efficient production

The professional cutting laser allows us to reduce the consumption of technical gases and abrasives, and the automatic bending centre does not require manual refitting, making the production process faster.

Economical solutions

We look for clever technologies - using the new under-burner bowl in our freestanding kitchens increases the efficiency of gas appliances by 4 to 6%.

Green technologies

We are raising awareness of energy saving by providing a wide range of induction appliances. Induction heats only the bottom of the cookware and does not work when not in contact with it, heat does not escape and electricity consumption is reduced.

Thermal insulation materials

We make sure that cooking is efficient and economical at the same time. The thermo-insulation used in the ovens protects the chamber from heat loss, so you can keep your food at the right temperature without consuming extra energy.

Reuse of materials

Dishwasher baskets, boards and other components that do not meet the quality standards are reprocessed by us into a new product. This prevents the waste of plastic.

6-BURNER FREESTANDING GAS TOP, SELF ASSEMBLY

- self assembly version with a robust structure
- legs and shelf connected by screws
- pilot flame
- cast iron grids
- removable dishwasher-safe bowl
- gas supply G20 or G30
- also available in gas versions G27 and G31
- adjustable feet

Self-assembly,
robust structure

REDUCER CAP

- allows work with small utensils, recommended for 3.5kW and 5kW burners

WOK OVERLAY

- allows using WOK cookware directly on a gas stove grate
- made of stainless steel

INDUCTION RANGETOPS

- designed for thermal treatment of food using induction suitable cookware
- induction technology is exceptionally power saving. It provides better working dynamics and lower energy consumption compared to gas or ceramic/iron cast electric hobs
- line of equipment that can be used as an element of the cooking line or as an independent heat treatment stations
- intended for small, medium and large gastronomy

FREESTANDING INDUCTION COOKER

- ergonomic knobs
- laser-engraved front panel
- appliance protection system available via the control panel
- induction fields with a diameter of 225 mm and a power of 3.5 kW
- 9 power levels regulated by a knob
- cookware detection system
- remaining heat indicator
- devices without exhaust system allow to work with cookware of larger diameter
- efficient cooling system
- adjustable feet

CAST IRON COOKWARE

- cast iron dishes with a black surface obtained thanks to the firing process
- ideal for serving hot dishes
- the thick bottom slows down the cooling of food
- double-sided grill hob recommended for standard gas and electric burners (perfect for preparing American and Argentinian steaks)
- cast ironware should be rinsed and dried before use; after use, wash them while still warm, preferably with dishwashing liquid, using a brush; always lubricate with vegetable oil after drying

Al

TABLETOP SCALES

- intended for work in the kitchen as auxiliary or control appliances
- LCD display
- multiple taring
- able to work without power supply
- overload protection

RS232 PORT WITH CABLE FOR CONNECTING CASH REGISTER / COMPUTER / POS

- port communicates with scales 730032, 730062, 730152, 730302 with a cash register or POS (cash register program)

Code	L mm	Price net (€)
730001	1500	44,00

AUXILIARY SCALE

- battery power supply (3 AA batteries included) or via the mains power supply (optional - power supply not included)
- working time on battery 300 hours
- measurement stabilization time approx. 2 seconds
- measuring range: g, lb, oz, dwt
- model 730011 used in the kitchen as a precision scale, portable dedicated to cafes (weighing coffee, etc.), confectioneries (e.g. brewing spices)
- integrated transport lock
- ABS case

SANELLI KNIVES PREMANA PROFESSIONAL LINE

- non-slip handle made of two types of plastic, hard (red) and soft (green)
- chrome-molybdenum steel blade with a hardness of 54-56 HRC

INOX

blade shape refined with the utmost care

blade shaft deeply embedded in the handle

blade made of carbon-chromium-molybdenum alloy with added vanadium with the designation X60CrMoV14 and hardness of 54-56 HRC

handle lining made of durable Santoprene and polypropylene with added Biomaster antibacterial agent

Patent/Brevet
Italy N° 199524
Europe N° 0176486
USA N° 4712304

FOR VERSATILE USE IN CATERING AND WIDE APPLICATION IN FOOD INDUSTRIES

- manufactured by a global Italian brand, whose tradition dates back to 1864
- blades have a concave cut for better knife balance, comfort and efficiency of the users' work
- each knife is finished and sharpened manually
- the homogeneity of the cutting edge with the optimal angle ($<35^\circ$) is controlled by means of laser equipment
- long-lasting sharpness of corrosion-resistant cutting edges with high hardness and carefully selected flexibility
- blades easily undergo the sharpening process
- ergonomic shape of handles developed at the Milan Polytechnic in the Ergonomics of Posture and Movement department using computer experimental tests
- unique handles made of Santoprene with added polypropylene for non-slip properties

Santoprene handles are made using a durable Biomaster antibacterial material; the added silver ions, which are an integral part of the material, inhibit microbial growth throughout the life of the knives, eliminating 99.71% of the most virulent bacteria: methicillin-resistant staphylococcus aureus (MRSA) and colibacillosis (Lat. Escherichia coli)

S.S.T. CONTAINERS WITH THERMAL INSULATION

- thermal containers to transport food
- lid with silicone seal, abrasion resistant, fitted with 6 latches
- base of flexible plastic to protect against mechanical damage to the thermoses and floor
- they have a vent valve to eliminate underpressure
- grip located on the lid serves to move the lid only

Double lid with silicone seal, abrasion resistant

Six latches holding the lid

Double walls and lid insulated with special foam retaining heat for 8 hours

Vacuum flasks for beverages with a tap

The temperature distribution of food in the steel container under the following conditions:

- initial temperature of food +95°C
- ambient temp. +20°C
- container fully loaded

FOOD TEMPERATURE AFTER 7 HOURS IS 65°C

COMPARTMENT VACUUM PACKING UNITS

- appliances for vacuum-packing of food and liquid products
- ideal for packing all kinds of Products
- device used in the sous vide cooking process at low temperatures
- while using the devices, you can use both slotted bags as well as smooth bags
- electronic control

COMPARTMENT VACUUM PACKING UNIT FOR PACKING LIQUIDS

- electronic pressure indicator
- length of the seal strip 254 mm
- seal width - single seal 3.5 mm
- ability to work in automatic and manual cycle
- possibility to change the time of suction and the time of bag sealing
- possibility of additional manual settings of the suction level
- the packing unit has the function of marinating dishes
- efficient air pump 25 l/h
- max thickness of the bags used 125 µ
- dedicated bags for packaging liquids, see p. 237
- max height of the Product packed 84 mm

TRAY SEALING MACHINE

- professional device for catering companies
- easy and quick to use
- an effective way of packing ready meals
- hygienic and tight packaging

TRAY SEALING MACHINE

- made of high quality stainless steel
- smooth and precise temperature control
- automatic foil cut-off
- stretcher to prevent foil curling
- welding pressure damper
- insulated handle to prevent overheating
- welding surface covered with a specialized eflon
- non-slip feet
- on / off light indication system with flooding protection
- warm-up time up to 10 minutes
- foil sealing time up to 3 seconds
- temperature control range 0-220 °C
- tray matrix included

MATRIX

- made of a special corrosion-resistant aluminum alloy

Single-chamber matrix included

BUFFET COLUMNS

Buffet columns are an excellent solution for arranging breakfast and banquet buffets. Varied height of straight and angular columns, as well as rich assortment of shelves made of wood in two shades of brown, glass shelves and slate plates, allow the possibility of free arrangement in a small space, allowing you to create unique displays of served dishes and snacks. Ease of installation and disassembly and the lightweight design make the column systems ideal for elegant receptions, events and catering.

BAR EQUIPMENT

Wide range of accessories, blenders and bar coolers essential in preparing great drinks or cocktails.

Blenders..... 201-202
Cocktail shakers, bartender's openers,
mortar, bartender strainers..... 204-205
Measuring cups,
bartender spoons..... 205-206
Coolers, champagne buckets,

BAR BLENDER

- designed to make cocktails or drinks with crushed ice
- rotation stepless adjustment
- stainless steel cutting blades
- automatic stop when the jar is removed
- temporarily increased speed during operation, if needed, with the "pulse" button
- lid with a hole
- metal drive coupling
- pusher included

DOUGH ROLLER

- appliance for rolling dough for pizza and bread
- the roller greatly simplifies and speeds up work
- dough thickness adjustment from approx. 1 ÷ 4 mm
- roll length L=300 mm
- recommended dough weight: 80-210 g
- appliance made of stainless steel
- 2 operating modes: continuous operation/foot switch

Foot switch

SAUSAGE FILLERS

- excellent quality appliances, intended for use in non-mass catering production as well as for amateur sausage production
- with its reliable and simple design, the appliance is easy, intuitive and convenient to use. High-quality materials used in the appliance guarantee reliable operation and long durability
- filling cylinder is mounted on both sides of the appliance's body, making it easy to use for left- and right-handed users

SAUSAGE FILLER

- reliable design made of stainless steel
- all removable parts of the device can be washed in a dishwasher
- piston equipped with a batch vent and a flexible replaceable gasket
- drive with gear reduction and two speeds of operation
- appliance equipped with 4 steel replaceable sausage funnels with the following sizes: 16, 22, 32, 38 mm.
- cylinder loading possible without having to disassemble it completely
- easy and even dosing of the filler batch

770201	298	360	65	2,5	2,0	230	93,12

INDUCTION COOKER

- professional induction stove dedicated to small and medium gastronomy, also great at home
- reduces energy consumption by approx. 45% compared to traditional heating equipment
- stainless steel housing made in extrusion technology
- impact-resistant ceramic induction hob
- automatic detection of dishes and adjustment of the heating surface to their diameter (2 zones)
- bottom diameter of the vessels used $\varnothing=120$ - $\varnothing 260$ mm

Requires using dishes designed for induction technology:

Glass touchscreen panel with dedicated timer

- work at constant power 10-20 level (1-9 pulse work), adjustable in steps
- ability to work with timer 001-479 min - set every 1 min
- 3 quick setting levels depending on the operating mode:
 - a) 1/10/20 for power mode or
 - b) 50/140/240 for temperature mode
- work with preset temperature 50-240°C (step adjustment)

Manual control

- Manual control panel
- Humidity regulation from 0 to 100%
- Timer up to 120 minutes and non-stop mode
- Manual chimney control
- Fan reverse
- Internal LED lighting
- End of the cycle signalling
- Door switch
- Double safety glass
- Drip tray
- Safety thermostat
- Water connection $\frac{3}{4}$ "
- Easy to clean
- Electric or gas ovens

Touchscreen control

- 5 or 7 inch touchscreen control panel
- Fan reverse
- End of cycle alarm
- Door switch
- Safety thermostat
- Internal LED lighting
- Water connection $\frac{3}{4}$ "
- Double, safety glass
- Climate Control - % humidity control
- 10-step fan speed control
- Steam control - programmable chimney
- 3 cooking modes: cooking, baking and steam cooking
- Multi-point probe, core probe (optional), vacuum probe (optional)
- Control of cooking with time, core probe or Delta T
- 120 programs with 6 cooking stages each
- AllOnTime
- MultiCook
- Regeneration / food temperature maintenance
- User configurable, cookbook with pictures
- Electric or gas version

Functions and equipmen

MANUAL COOKING

Enables easy setting of the operating modes for any dishes, without the need to create a recipe. Simplifies the food preparation process.

120 PROGRAMS 6 STAGES EACH

The oven operates 120 programs in 6 stages.

STEAM CONTROL

The technology enables precise humidity level adjustment inside the oven's chamber within the range from 0 to 100%, with fine adjustment of 5%.

COOKBOOK

All ovens with touchscreen control have an installed cookbook. Line Stalgast SmartCook has easy to read cookbook. The book has as many as 72 recipes, divided into 8 groups. In addition, each dish has a photo, which improves the intuitiveness of the cook's work.

FAN CONTROL

10 regulation levels of the fan operating with a reverse allow to prepare the most delicate dishes. Changing direction of fan rotation ensures even temperature distribution inside the chamber, even when fully loaded.

HACCP

HACCP DATA RECORD

The oven records the history of the operating modes and parameters of the device in the HACCP system (Hazard Analysis and Critical Control Points). One can easily save the report on a USB drive.

CLIMA CONTROL

The chimney control enables fast lowering of the humidity level inside the chamber. Automatic chimney opening before the end of the operation of the device function is available which allows to achieve the desired level of baking.

PREMIX GAS BURNER

Available in all gas stoves, new burner which lowers gas consumption. Its construction enables even temperature distribution inside the oven's chamber.

DELTA T

Advanced mode which requires the use of the attached to the stove probe. It allows to maintain a constant temperature difference inside the product and the oven chamber. Slow baking lowers weight loss of the product and provides the perfect culinary effect.

REGENERATION / TEMPERATURES MAINTENANCE

Regeneration allows to reheat previously prepared dishes, preserving taste and aesthetic qualities. Temperature maintenance allows delayed meals serving.

MULTIPOINT PROBE

Enables the use of an additional probe to measure temperature in three different points (optional).

PROOFING

This function is particularly often used in bakery and confectionery for control of dough proofing. Constant temperature during dough proofing ensures great pastries results.

VACUUM PROBE

Provides the highest precision of temperature measurement inside of the food with the vacuum cooking technique SOUS-VIDE. 1.5 mm diameter thin probe is adapted for use with vacuum bags (optional).

PLANNING

Delayed start function allows to save time. Scheduling device working hours allows to prepare long cooking dishes for desired time.

FAST COOLING

Automatic cooling of the chamber to the desired temperature, so that one could start preparing the next dish faster.

MULTIWASH

Depending on the level of dirt in the chamber there are 3 automatic washing programs available. The length of individual washing cycles is: 51', 81', 111'. **For ovens not equipped with automatic washing system, one can purchase a shower.**

ALLONTIME

A mode that allows serving of many dishes at the same time. A clear signal will inform when the next products is to be added so that all the products were ready at the same time.

MULTICOOK

The convection steam oven allows to prepare many products at the same time, without mixing flavours and aromas. The device can be loaded and unloaded continuously. The device will inform the user once a specific product is ready.

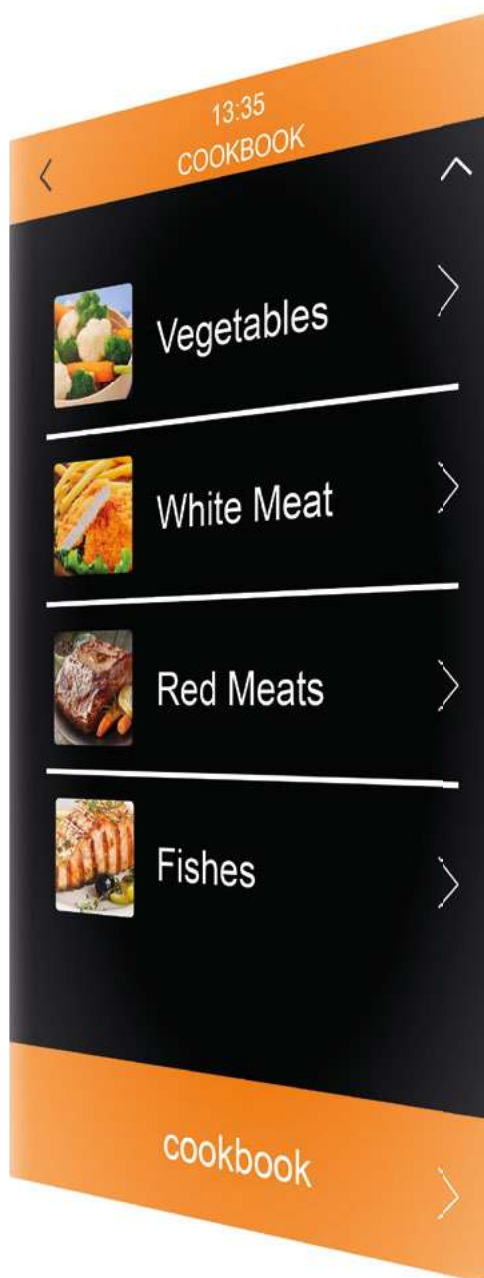

MULTIPREHEAT

3 oven preheating modes: soft (+10 °C), medium (+20 °C), hard (+30 °C). Depending on how much the chamber is loaded it is possible to preheat the chamber to a higher temperature.

SOUS-VIDE

A process of slow cooking in vacuum. This technology allow to retain the nutritional value, taste and aroma of the products. Sous-vide probe (additionally available) will help to maintain the optimal temperature of the prepared product in the oven.

COOLING

All kinds of refrigeration and freezing equipment that is an essential equipment element for any type of catering establishment, ensuring the proper storage of food.

Refrigerators
and freezers 288-289, 302-304
Salad refrigerated counters,
cooling tops 293-295, 300
Refrigerated and freezing
counters 290-292, 296-297

Display cases 298-299
Refrigeration 600x400 300
Bar tables and display cabinets 305-309
Accessories for refrigerated
cabinets and tables 308
Chest freezers, shock coolers 309-311

DESCRIPTION OF ADDITIONAL MARKINGS FOR THE COOLING CHAPTER:

Refrigeration appliance

Freezing appliance

or

and

Static system

Dynamic system

For confectionery/bakery trays

For gastronomic containers

For gastronomic containers

Opens from both sides

Hinged doors

Sliding doors

TYPES OF COOLING SYSTEMS:

Static (the so-called gravitational cooling), where warmer and, therefore, thinner air layers accumulate in the upper part of the appliance, while the cooler ones fall down (making the lower shelves always cooler than the upper ones). Stalgast static appliances use a **mixing fan** (to facilitate movement) in the compartment to equalize the preset temperature.

Dynamic (the so-called forced cooling), where the air circulation ensures quick cooling of freshly placed products and even distribution of low temperature inside the device. Special mechanism stops the ventilation when the door is opened, which prevents hot air from flowing in, allowing the food to maintain a constant temperature.

static system diagram

dynamic system diagram

REFRIGERATORS & FREEZERS

- refrigerants used: R290 and R600a
- housing and compartment made of stainless steel (INOX marking) or white powder-coated sheet
- fitted with forced air circulation
- automatic defrosting
- electronic controller with temperature display
- self-closing door
- adjustable feet (+45 mm)
- profiled handle for convenient opening
- door lock
- valve face heaters in the freezing cabinet

WHEELED REFRIGERATOR / FREEZER, ONE DOOR

- front wheels equipped with a brake
- lighting
- automatic condensate evaporation
- 3 shelves GN 2/1 with a set of guide rails
- 20 levels for guide rails
- insulation thickness 60 mm
- dedicated guide rails - Code 830644
- dedicated shelves - Code 830645
- front wheels equipped with a brake

Characteristics of our stainless steel furniture

All our products made of stainless steel are a monolithic welded or bolted structure according to the product's design requirements. All furniture is fitted with adjustable feet and a protective equipotential pin.

TABLES, SINKS, WASHBASINS (WALL-MOUNTED)

- include 100x15 mm box-shaped upstand as standard

- from +25 mm to -5 mm
- legs made of angle bar

TABLE TOPS

- made of stainless steel
- reinforced underneath with double-laminated panel
- the edge of the plate at the rear is protected by a stainless steel profile

CABINETS

- cabinet bodies made of stainless steel
- cabinet legs made of square profiles
- cabinet shelves reinforced by bending the inside edge and using metal profiles (omega type)

TABLE FEET

- made of square profiles
- adjustable feet in the range from +25 mm to -5 mm

TABLE TOPS WITH SINKS

- lowered around the perimeter of the top edge
- reinforced with metal profiles („C” shaped)
- equipped with a hole for a diameter tap min. 33 mm

TABLE BASES

- reinforced in the upper part with a metal frame or square profile
- clearance between the floor and the lower edge of the profile, shelves, or bottom of the furniture

SINK COMPARTMENTS

- made of stainless steel
- equipped with a siphon hole

DOORS

- made of two layers of sheet metal in the form of a stiffened can
- fitted with a magnetic latch
- fitted with a recessed handgrip (handle) made of ABS

BASINS

- made of stainless steel
- equipped with a hole for a diameter tap min. 33 mm

SLIDING DOORS

- suspended in the body on a stainless steel guide and moved by means of rollers
- easy disassembly of the door

RACKS

- rack shelves reinforced by bending the inside edge and using metal profiles (omega type)
- maximum load on the shelves is 70 kg/m²
- adjustable feet in the range

STALGAST DISHWASHERS

AQUA

NEW

Made in Poland:
Modern catering equipment
factory in Radom.

In 2008, we launched a factory in Radom manufacturing stainless steel catering furniture, dishwashers, heating lines, serving lines and plastic catering accessories.

HOOD-TYPE DISHWASHER

- professional dishwasher with sanitization function
- electronic control
- suitable for washing trays, glassware, cutlery and plates
- detergent and rinse aid dispenser
- cycle time 120/180 sec.
- digital temperature display for the boiler and compartment
- 2 pairs of washing-rinsing arms (top/bottom)
- water consumption 2.5 liters/cycle
- maximum height of the washed dishes 415 mm (+/- 5mm)
- rack 500x500 mm
- racks included: a rack for plates, a glassware rack, and a cutlery rack and container
- the appliance should have a water purifier installed to protect it from scaling
- adjustable feet (45 mm)

WATER FILTER

- reduce the carbonate hardness of drinking water
- they prevent limescale in connected terminal appliances
- they rackd heavy metal ions, e.g. lead and copper
- reduce water cloudiness
- reduce organic contaminants affecting the water's taste
- they remove chlorine residues in filtered and tap water

WATER FILTER

- universal water filter
- electronic measurement and display module: automatic indication of the remaining filter capacity, information on exceeding the filter's capacity

Electronic measurement
and display module
